

Senior Frontend Developer (8+ Years)

Frontend developer with 8+ years of experience building responsive, maintainable web applications and user interfaces. Experienced across product portals, dashboards, workflow-driven applications and API-integrated interfaces, with a strong focus on clean component structure, usability and responsive implementation.

EXPERIENCE

e-Zest Solutions Ltd. / Sr. Software Engineer (Pune)

Apr 2021 - Apr 2025

Prolim Solutions / Sr. Software Engineer (Bangalore)

Jul 2019 - Oct 2019

LMS Solutions / Sr. UI Developer (Indore)

Apr 2016 - Apr 2019

CXS Media / UI Developer (Indore)

Jan 2014 - Jun 2015

CAREER TRANSITION

My career includes periods of transition between full-time roles, including the current transition from Apr 2025. These periods are grouped here rather than presented as separate gaps. During these transitions I remained focused on frontend/UI development and preparing for suitable long-term opportunities.

SELECTED PROJECTS

Compatibility Checker

Responsive application that determines whether a device is compatible with selected applications, with manual search and QR-based device identification.

Technology React.js, Next.js, JavaScript, Hooks, Tailwind CSS

Key Contributions

- Built reusable presentation-focused UI components using React.js and Hooks.
- Implemented Next.js App Router for navigation and static page generation.
- Integrated device-detection and QR-scanning functionality.
- Developed responsive layouts for mobile and tablet users.

OneID Portal

Administrative web portal for managing a mobile application and its operational workflows.

Technology React.js, React-Admin, Hooks, CSS3, Material UI

Key Contributions

- Developed reusable interface components with React.js and Material UI.
- Used React-Admin for data fetching, routing and component development.
- Implemented RBAC for admin and super-admin users.
- Worked on authentication, login/logout and refresh-token session handling.

PhpStorm

EDUCATION

UIT RGTU / MCA

Oct 2009 - June 2012

Focused on UI Development and Responsive Design; major project in online shopping.

ScottDunn

Luxury travel website presenting premium holiday experiences across ski destinations, safari lodges and expedition cruises.

Technology HTML5, CSS3, JavaScript, Sass

Key Contributions

- Reworked the website from the ground up using semantic HTML/CSS and Sass.
- Created modular Sass mixins and inheritance patterns for maintainable styling.
- Developed custom media queries for mobile-friendly presentation.
- Used Lighthouse checks to identify and improve frontend performance.

ADDITIONAL PROJECT EXPOSURE

Google Maps Hotel Search, Filter & Advanced Filter, RealTime Clinic, Innovecsys, Spaceez, Uhpeer and BETS.

PROFESSIONAL CONTRIBUTIONS

Reusable UI Architecture

Built reusable, component-driven interfaces and common UI patterns with attention to maintainability and consistency.

Responsive Web Development

Translated designs and requirements into layouts for desktop, tablet and mobile using HTML/CSS, Bootstrap, Sass, Flexbox and CSS Grid.

API & Application Integration

Worked with API-driven interfaces for authentication, registration, filtering, search, mapping, device compatibility and data-driven workflows.

State & Access Management

Worked with React-Redux, Redux, Context API, reducers and role-based access control to support application state and user permissions.

TARGET ROLE

Senior Frontend Developer / React.js Developer
